COVID-19 Exposure Guidance for Providers

Atlas Medical Providers who are exposed to probable or confirmed cases of COVID-19 should monitor themselves for symptoms and wear proper PPE at all facilities. Exposed providers can continue to work as long as they are asymptomatic. If an exposed provider develops symptoms of COVID-19, they will be restricted from patient care immediately.

If an Atlas Provider develops any symptoms consistent with COVID-19 (fever or respiratory symptoms), they must:

- Cease patient care activities immediately.
- Put on a facemask immediately (if not already wearing one).
- Be tested for COVID-19 and put on immediate home quarantine.

An alternative Atlas provider will cover for any quarantined providers to ensure patient care continues.

COVID-19 Clinical Management

Clinical management should be per normal protocols and approaches to viral pneumonia. There is no specific FDA-approved-treatment for COVID-19. Please contact Dr. Pace if you have any COVID19 treatment questions. (Treatment Protocols are being developed)
